ThanksShoegaze music (also known as 90's shoegaze or UK shoegaze) is a genre of atmospheric, dark, emotional, dreamy and ethereal post-punk music that emerged in the 1990s and characterized the first half of the 1990s. Origin 90's shoegaze has its roots with the experimental new wave bands that emerged in the 1980s, especially in the UK. After the breakup of the band Ride, Nick Oliveri of Kyuss (who also left the band in 1989) had a more experimental sound, a more doom-like sound, and even recorded his own LP, linking Nick Oliveri to krautrock pioneers Cluster. After the band Hawkwind disintegrated, Vivian Stanshall of Gong experimented with a more experimental sound (although his sound is usually closely associated with shoegaze). At the same time, the groups Ride and Curve also experimented with melodic tones, especially with their lyrics. The label!K7 emerged in the 1990s, probably in 1993. In 1995,!K7 released the album Venetia, having a sound similar to Curve. Italian producer Marco Castoldi also released an LP around 1993, and later founded Sonocasa, releasing several CDs and an LP.
